

PARTNER INDONESIA

Perkumpulan Partner untuk Keadilan Ekologi Indonesia

(PARTNER INDONESIA) is a Non-Government Organization Established in Indonesia in 2025

We were born from a deep collective awareness of the ecological crisis that increasingly threatens people's living spaces and from the belief that change is only possible when advocacy campaigns are combined with a solid grassroots movement.

The "Partner Indonesia" Association was founded on November 1, 2025, as a shared space for environmental advocates, legal aid practitioners, researchers, and community organizers from across Indonesia. Our strength is rooted in the collective experience of our members who have long worked with communities in diverse landscapes, from forests and watersheds to coastal areas and small islands.

VISION

To realize Ecological Justice in Indonesia, we must ensure that the people's right to a clean and healthy environment is fulfilled, and urge the state to consistently protect human rights.

MISSION

The environmental crisis is a humanitarian crisis. Therefore, our hard work focuses on:

- **Environmental Protection:** Countering the destructive power of extractive investments and policies that destroy nature.
- **Economic Strengthening & Community Resilience:** Helping communities adapt to and mitigate the impacts of ecological disasters.
- **Human Rights Defense:** Standing at the forefront of rejecting all forms of criminalization of environmental activists, farmers, and indigenous communities.
- **Climate Justice:** Advancing climate justice to ensure that climate action and energy transition are fair, democratic, and do not sacrifice people's living spaces.

STRATEGIC AGENDA

2026 - 2029

As a newly established organization, we measure ourselves not by claims about the past but by the clarity of our agenda ahead. Our first Four years are directed toward:

- Consolidating Working Groups in priority landscapes and participatory mapping of land and living-space conflicts in members' working areas.
- Establishing a legal aid unit and a public-interest lawyers network for rapid response to the criminalization of environmental defenders.
- Publishing a field research series on the impacts of extractive industries on people's living space.
- Developing resilient community economy models in at least three accompanied landscapes.
- Institutional strengthening: standardized financial systems, independent audits, and member capacity development.

ACCOUNTABILITY & TRANSPARENCY COMMITMENTS

Public trust is our core asset. Since our founding, we have adopted the following governance standards as binding commitments:

- Annual narrative and financial reports published publicly to members and the public.
- Independent external financial audits beginning in the first fiscal year that meets audit thresholds.
- An organizational code of ethics and protection policies for staff, members, and partner communities.
- An anti-corruption and conflict of interest policy, with a secure whistleblowing mechanism.
- Rejection of funding from political parties, governments, or companies that damage the environment.

THE VALUES WE HOLD

Independent

We reject intervention by political parties, governments, and environmentally destructive business interests in all organizational decision-making.

Transparent & Accountable

We act with integrity and full accountability to our members, partner communities, and the public.

Evidence-Based

All our advocacy and campaigns rest on field research and verifiable data.

Ecocentric

Our agenda is driven by the real needs of nature and communities living space at the local level, not by the interests of any elite group.

JOIN THE MOVEMENT

Major changes cannot be achieved alone.
We invite you all to collaborate in protecting
Indonesia's living space and planet.
